

The Only Fully Managed and Monitored Global Cloud Backup Solution that Supports Your Entire Digital Footprint

KeepItSafe® Online Backup is the ideal cloud backup solution for IT environments of any size — from small businesses to the largest enterprises. It is the industry's most secure, scalable and easy-to-manage online backup and on-demand data recovery service — and the only global cloud backup solution fully managed and monitored 24/7 by a team of experts. Should you ever lose data to a disaster, KeepItSafe Online Backup can immediately restore any missing files to your original servers or location you specify.

No matter the size or location of your organisation, KeepItSafe Online Backup is the smart choice to protect all of your business data.

Unique Benefits of KeepItSafe Online Backup

Fully Managed and Monitored

- ✓ Managed backups with 24/7 support
- ✓ Proactive monitoring and notification
- ✓ Daily report inspection
- ✓ Emergency service at no charge

Highly Flexible

- ✓ Supports all servers, databases, OS, apps, etc.
- ✓ Can be deployed in public, private and hybrid cloud models
- ✓ Unlimited scalability for devices, device types and locations
- ✓ Will restore lost data to any hardware you specify, at any location, anytime

Highest Levels of Security, Encryption and Quality Control

- ✓ AES 256-bit encryption in transit and at rest (highest levels available)
- ✓ Uses military-grade data encryption technology
- ✓ ISO 27001 and SSAE16 certifications
- ✓ Meets and exceeds even the strictest data-security regulation

Complete and Rapid Data Restoration

- ✓ Data is compressed, encrypted, and securely transferred to primary data centre
- ✓ Data is seamlessly and continuously mirrored to secondary data centre
- ✓ Lost data can be restored to your servers or other hardware with one click

Why KeepItSafe Online Backup — The Most Secure, Cost-Effective and Easy-to-Use Cloud Backup

Designed to support the entire digital footprint of businesses of any size, KeepItSafe's cloud-based platform provides you with **continuous data backups over the Internet** and, upon demand, a restore of missing files or even entire servers back to your original location or to any storage hardware you require.

KeepItSafe **saves your IT staff time and resources**, so they can focus on more mission-critical and forward-looking initiatives.

What Your Full Managed and Monitored KeepItSafe Online Backup Solution Includes

Data Recovery Assurance

Redundant offsite data protection means assured recovery of lost data in minutes.

Flexible Backup Schedules

Set automatic or perform manual backups whenever you choose.

Self-Healing

KeepItSafe uses systemic remediation to continually verify data integrity.

Easy to Deploy

Our system can be deployed in minutes and requires no special staff training.

Replaces Tape

Remove the time, expense and possible human error in tape backup.

256-bit Encryption and SSL Transmission

The highest levels of encryption and security for data in transit and at rest.

Deduplication

Eliminates redundancy, reducing bandwidth loads and accelerating backups.

User-Defined Retention Guidelines

Set your own rules for how long KeepItSafe keeps deleted files on our servers.

Security and Compliance

Among the world's few ISO 27001-certified firms, we help you meet the strictest regulatory demands.

Unlimited Scalability

KeepItSafe can scale up to continually meet the backup needs of your business.
