

# ALFA REMOTE OFFICE

## EVERYTHING 'IN THE CLOUD'

Alfa RemoteOffice gives you the option of hiring space on a server - sometimes called cloud computing - for your AlfaPro software or webshop. It saves you having to make major investments in hardware and gives you greater transparency when it comes to your monthly outgoings. Easy to use, through a fast and secure internet connection, it gives you instant access to all your computer files, anytime and any place, just as if you were in your own office. Likewise, printing and remote loading and clearing of hand-held terminals are no problem whatsoever.

Alfa RemoteOffice is supplied with an automatic back-up system. Several financing options are also available in combination with AlfaPro software.

- Instant access to all your business data
- Easy to use
- Safe and reliable
- Automatic back-up
- A fixed amount per workstation every month
- Works with Windows 7, 8, 10 and Vista
- Also suitable for home users
