

MOBILE WORKSTATION

EASY ACCESS IN THE COLD STORE

To meet the increasing demand for mobile solutions - for example, in a cold store - ALFA PRO IT developed the mobile workstation. A fixed network or mains connection is no longer required. You can carry out scans, register and/or print stock, price or distribution labels from almost anywhere. It provides an excellent alternative to the standard service trolley.

The mobile workstation can be fitted with or without a shutter. Components for the mobile workstation can be modified in consultation.

The mobile workstation consists of a trolley with the following items:

- PC (incl. wireless network connection)
- LCD screen
- Battery with charger
- Keyboard and mouse
- High quality label printer
- Wireless scanner
