

ALFAPRO SOFTWARE: MAXIMUM INSIGHT

SOFTWARE FOR WHOLESALERS, IMPORTERS, EXPORTERS, BOX SALES AND ROUNDSPERSONS

AlfaPro provides IT solutions that fit your business needs like a glove. These solutions are in tune with the size and nature of your business, but still give you the flexibility to expand if need be: it's all part of our daily work. Our solutions are affordable and customised to the needs of businesses in the fruit & vegetable trade, from growers or producers to resellers. Not only that: we provide maximum insight when it comes to exchanging information with your own admin, webshop, mobile sales, etc. AlfaPro is the heartbeat of your business!

For wholesalers, importers, exporters, cash & carries and roundspersons - in fact, for just about any business in the fruit & vegetable trade - AlfaPro is the software par excellence. Not only is it extremely practical and easy to use, it's also available whenever and wherever you want: on your PC, as part of an office network, on the laptop, or on your hand-held terminal where you can register your sales to customers, either in the showroom or on the road. Using the latest internet technology, it's also possible to link up to several branches so that information can be exchanged in an instant.

SIGNIFICANT TIME-SAVINGS

AlfaPro is fully geared up to your everyday working practices. Never before has one industry-specific system offered so much functionality. In an instant, it's possible to register your purchases and sales, to control your stock management, to organise your invoicing, to enter the correct data in your bookkeeping system and to get all the management information you need. It leads to significant time-savings. Additionally, you minimise the risk of serious errors by entering the data once only or by scanning barcodes. What's more - and maybe just as importantly - AlfaPro can also be linked up to stocks held by fellow wholesalers (virtual marketplace).

MODULAR STRUCTURE

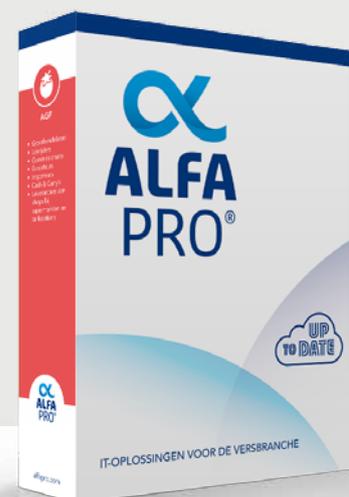

AlfaPro has a modular structure, which means that you can choose exactly what you want to automate. If you'd like to add extra applications at a later stage, AlfaPro allows you to expand the package of functionalities. To this end, AlfaPro has dozens of specialist modules, which means your system can always be customised to your own individual requirements. If your business expands, AlfaPro can expand with it. You will never again need to buy a completely new package.

A SINGLE SYSTEM TO SUIT ALL NEEDS

AlfaPro provides IT solutions for small-, medium- and large-sized enterprises in the fruit & vegetable trade. It is a single system fully geared up to the needs of your business and designed by experts with roots in your own industry. And it's not without its admirers: more than 750 companies are already using AlfaPro to their complete satisfaction, giving them maximum insights every day.

ALWAYS UP-TO-DATE

AlfaPro is an ALFA PRO IT product. The system is extremely reliable with nothing left to chance. In fact, should new regulations come into force or the needs of users change, we can make updates available almost immediately. In this way, AlfaPro is always up-to-date.
