

COMPLETE SYSTEM FOR ON-THE-ROAD SALES AND CASH & CARRY

ALWAYS UP TO SPEED, ANYTIME, ANYWHERE

With the AlfaPro Mobile App, you're always online, whether it's 3G, 4G or Wi-Fi. The App allows you to process everything you enter directly in your admin and stock systems, either in the Cloud or back at base. It's efficient and time-saving. If you're in on-the-road sales, your customers will be able to view your (mobile) stocks in your webshop and place their orders accordingly. Sales can be processed on the spot. Goods received can be signed for digitally and delivery notes and invoices emailed straight to the customer. Orders for subsequent rounds can also be entered without difficulty.

OPERATION WITH TABLET OR HANDY 5-INCH PDA

Depending on how your business works and your personal preferences, as an AlfaPro Mobile user you can choose between the 8-inch tablet and the handy 5-inch PDA (telephone format). In fact, the latter is multi-functional and can be used as a smartphone and also incorporates a barcode scanner. The PDA allows you to do everything you need to do in a single device!

PRINTING EN ROUTE ALSO POSSIBLE

Would you rather give your customers a paper invoice or delivery note? ALFA PRO IT's unique flightcase system incorporates a high-speed printer. Compact, lightweight, low-maintenance, low energy, reliable, able to withstand cold and damp and - not least of all - highly affordable.
